Why let the children suffer?

Many parents who have their eyes examined regularly and keep their eyesight keen by wearing carefully made and properly fitted glasses, neglect to have their children's eyes protected as they protect their own.

Regular examinations of children's eyes—especially when the children are in school—is of the utmost importance. Little eye defects become big defects when neglected.

GOLD PLATED FRUIT

The fruit on the banquet tables of Alexander the Great was heavily plated with gold.

When it was served, the plating was torn off and flung to the servants.

Evidently Alexander considered the delicious fruit of the tree more precious than gold.

An opinion shared by many who have feasted on the luscious, ripe fruit served at CHILDS.

Sliced peaches, plain, or with cream, or better still, topped with CHILDS famous ice cream.
